

Demographic Overview of Dual Eligibles

Five Slide Series, Volume 4
September 2013

The Menges Group

Summary

- 8.8 million persons had both Medicaid and Medicare coverage during 2010. These dual eligibles represent 16% of all Medicaid beneficiaries and 18% of Medicare beneficiaries
- Most dual eligibles (75%) qualified for full Medicaid benefits during 2010. This group is commonly referred to as “full duals”
- The remaining dual eligibles (“partial duals”) received coverage only for selected Medicaid services, such as cost sharing for Medicare covered services and payment of Medicare Part B premiums.
- Overall, the nation’s dual eligible population increased 20% from 2005-2010, spurred by a doubling of the partial dual subgroup. The full dual subgroup increased by 6% during the 2005-2010 timeframe.
- The national age mix of dual eligibles is 59% 65+, 41% <65
- The national gender mix of dual eligibles is 62% female, 38% male

State-Specific Dual Eligible Demographics, Alabama - Kentucky

State	Average Covered Persons, 2010			Demographic Mix of All Dual Eligibles, 2010				Average Covered Persons, 2005			Percent Change, 2005-2010
